HONEYWELL'S SECOND GENERATION LYRIC ROUND™ WI-FI THERMOSTAT SIMPLIFIES HOME COMFORT AND CONTROL FOR INSTALLERS AND HOMEOWNERS ALIKE

Apple® HomeKit™ Compatibility Offers Easy, Secure Control Using Siri®*

MINNEAPOLIS, March 10, 2016 – Busy lives and the demands of ever-changing schedules have consumers clamoring for products to help them connect to their homes and simplify their days. Honeywell (**NYSE: HON**) makes it easier for installers to capitalize on the demand for connected products with the new second generation Lyric Round™ Wi-Fi Thermostat, now compatible with Apple HomeKit™** for control using Siri®, and easy integration into other current smart home ecosystems.

The second generation Lyric thermostat is ideal for homeowners who want the freedom to stay in touch with their home's connected systems to maximize savings and comfort. Installers can access the on-screen menu for installation right at the thermostat or by using the Lyric app, making installation faster and easier. Using a customer's smartphone location, the thermostat can automatically adjust the temperature as they come and go, known as customizable geofencing – delivering comfort when they're home and savings when they're away. Lyric is great for families with busy, unpredictable schedules; tech-savvy homeowners who use apps; homeowners who aren't yet realizing savings by programming their thermostats; and homeowners who want to integrate a connected home system.

The second generation Lyric thermostat is compatible with 24-volt systems such as forced air, hydronic, heat pump, oil, gas and electric and features the same sleek aesthetic and intuitive features of the original, such as location-based, customized

temperature control. It also can be easily integrated into other smart home ecosystems, such as Samsung® SmartThings™, and can link to many home products and services that customers choose.

“Lyric is comfort made simple. With no complex menus, the Lyric thermostat offers a fun and engaging way to control home comfort,” says Honeywell design director, Ted Booth.

For installers, the second generation Lyric provides:

- Easy setup: Take care of installation and setup right at the thermostat or through the Lyric app.
- Added Value: With products that deliver comfort, convenience and remote diagnostics, contractors can provide more proactive service to the customer beyond the initial sale.
- Ecosystem Integration: The contractor is now able to capitalize on the demand of connected home by offering an integration into smart home ecosystems

For homeowners, key features and updates for the Lyric thermostat and app include:

- Customizable Geofencing – consumers can create a custom geofence map and distance, enabling the Lyric thermostat to deliver “comfort when you’re home, savings when you’re away” with even greater accuracy.
- Smart Alerts – the Lyric thermostat can send reminders about filter changes, warn of extreme temperatures and humidity inside the home, and more.
- Intelligent Comfort Control – to make sure 72 degrees feels like 72 degrees, the Lyric thermostat considers temperature and humidity to maintain comfort, and can also work with your system to adjust in-home humidity levels.
- Custom Shortcuts – create a dynamic heating/cooling schedule, and set up recurring event triggers with a single touch of the thermostat or app.
